

Box Butte General Hospital utilizes the look-back method to establish its Amount Generally Billed and (AGB) Percentage. The AGB is the Hospital's gross charges multiplied by the AGB Percentage. In order to calculate the AGB the Hospital uses reporting from our clearing house. The Complete Remit Analyze report allows us to review claims data for a 1 year period from January 1st through December 31st. AGB is calculated annually and updated within 120 days from the end of the period date.

Current Year AGB = 30%
